

PROJECT SUPER ACHIEVERS™

Project Super Achievers™ acknowledges the various mindsets and mentalities that are driving the students' behaviour in life and in their academic pursuit of excellence. With holistic measures designed to boost overall student performance weaved into the learning solution, students grow in confidence that academic success is within grasp and learn to powerfully leverage on lifestyle and environmental factors along with strategic individual and team study skills to catapult them to their next level of academic excellence.

PROJECT SUPER LEARNERS™

Underachievers encounter tremendous challenges in their mental and emotional spheres that often cripple and affect their learning and academic performance. Project Super Learners™ helps students rediscover their personal vision in lives by helping them see with greater clarity and understanding, the relevance of academia in relation to their personal life vision. The students are equipped with greater response-ability and resilience to overcome their academic challenges while simultaneously given concrete handles on how to effectively enter into a new cycle of academic performance and success.

Project Super Achievers

"I strongly recommend this learning solution to other schools with similar challenges in their graduating batch of students, and who want to give them a holistic boost for their personal and academic life. The content and delivery of this learning solution is indeed effective and affective."

*Mr Subramaniam, HOD Pupil Development
Whitley Secondary School, 14 Feb 2007*
